## Professional profile

10+ years in IT and design, including 5+ years focused on product and enterprise interfaces. My portfolio includes over 20 digital products for Russian and international companies in construction, manufacturing, oil and gas, retail, logistics, education, finance, and tourism (SaaS, ML, Computer Vision, Big Data, CAD/CAM, BIM, AR/VR, etc.). I combine strong UX/UI expertise, a product-focused approach, a technical background, and an understanding of business challenges.

## Experience

Portfolio with case studies

### Lead Interface Designer

Jul 2026 – Present

Fintech-Platform · Fintech / Payment solutions

Moscow, Russia · Remote · Full-time

– Audited the current state of the design system.
– Compared the UI kit in Figma with its implementation in code.
– Prepared a plan for improvements and further development of the design system.
– Owned the design system for the company's products.
– Contributed to the design of fintech product interfaces, including a payment system and payment services.

### Senior Product Designer → Design Team Lead

Oct 2020 – May 2026

Rubius · Software Development

Tomsk, Russia · Hybrid · Full-time

– Participated in the development of 20+ digital products for Russian and international companies.
– Designed interfaces for web, mobile, and desktop products: enterprise systems, SaaS platforms as well as CAD/CAM/BIM, AI, and AR/VR products.
– Created and evolved design systems for corporate and product solutions, including building new systems from scratch.
– Conducted UX research, analyzed user scenarios, and identified opportunities to improve the user experience.
– Defined information architecture, user flows, and complex business processes.
– Created wireframes, interactive prototypes, and final interfaces in Figma.
– Worked with product teams and developers across all stages of the product lifecycle.
– Ran Design Review and Design QA before feature releases.
– Worked with product metrics, including Conversion Rate, NPS, and other product and UX metrics.
– Redesigned and evolved internal company products, including a corporate platform.

**Additional experience:**

– Led a team of 4 designers.
– Participated in hiring and developing designers, including hiring decisions for 3 specialists.
– Built a transparent approach to designers' professional growth through an evaluation system, competency matrix (hard & soft skills), and individual development plans.
– Regularly ran Performance Review and 1:1 meetings with designers.
– Established collaboration processes between design, development, and management.

### UX/UI Design Course Lecturer

Mar 2023 – Jun 2025

Rubius Academy · Online Education

Tomsk, Russia · Remote · Part-time

– Created the training program and launched the first interface design course at the Academy.
– Ran 5 educational cohorts and mentored 30+ students.
– Delivered lectures, ran workshops, and reviewed practical assignments.

### Product Designer

Sep – Nov 2025

Looqs · AI Service

Saint Petersburg, Russia · Remote · Part-time

– Designed the web product and developed the user experience for a digital AI assistant and stylist.
– Designed the promotional landing page: the new landing page started bringing in ~40 users per day from SEO.

### UI/UX Designer

Jan – Dec 2024

Turkiye Travel · Travel Tech

Turkey · Remote · Part-time

– Designed the user experience and interfaces for an online marketplace of tourist services for Russian-speaking audiences in resort cities across Turkey.

### Sales Manager / Partnership Relationship Manager

2016 – 2020

Forecast NOW! · IT / RedStone Capital · Fintech

Tver / Moscow, Russia · On-site · Full-time

– Sold software licenses, worked with clients and business partners, and developed B2B directions for IT products.
– Gained experience at the intersection of product, business, and sales. This experience helped build a deep understanding of business processes, the commercial effectiveness of digital products, and collaboration with key stakeholders.
